

7 July 2020

To Whom It May Concern:

I am writing this letter of recommendation regarding Trevor Kempster, of 13 Shaw Road Hatton Vale QLD 4341.

I am a professional engineer and have known Trevor for more than five years in his capacity with TBA Firefly™. My knowledge of Trevor is based on presentations I've heard him give in professional settings as well as with his direct sales involvement for some of my engineering projects.

In all my interactions with him, I have found him to be professional, knowledgeable about the TBA Firefly™ product line and helpful in identifying the appropriate product to meet my clients' needs.

One outstanding virtue is Trevor's passion to get it right! He is a strong advocate of testing and compliance with building regulations. I have never heard Trevor attempt to sell something for the wrong application.

Likewise, Trevor has a unique ability to think outside the square. He's always been able to assist me identify cost effective creative solutions to resolve both new construction issues and more important rectification approaches for existing non-compliant buildings.

As a result, I have referred not just clients, but colleagues from other engineering companies to Trevor as I know they will get the right answer. He is the exemplar for a fire protection product supplier and sets the benchmark that others in the industry should be striving to meet.

All in all, I am pleased to give Trevor my highest recommendation and look forward to working with him for many years to come.

Sincerely,

A handwritten signature in black ink, appearing to read "JB" followed by a stylized flourish.
